

**APP Timber*Greenheart*** offers a superior quality which requires little maintenance. We all know that warping, twisting, cracking, splitting, painting and rot are all problems that have been associated with timber, especially cheap timber if timber is not well maintain.

Correctly fitted, coated and maintained solid **APP Timber*Greenheart*** products will last a lifetime, but correct fitting is crucial. Therefore, any solid timber products require regular cleaning and your wood floors /decks can look beautiful for a lifetime.

There are steps you can take to minimize maintenance and maintain the beauty of your solid timber floor as well according to flooring supply instruction.

Timber being a natural product is affected by environmental conditions. Excessive heating and prolonged use of air conditioning should be monitored and regulated. Ventilation from open windows can help in this respect. Direct sunlight through uncovered windows should be corrected by the use of suitable window treatments.

Your **APP Timber*Greenheart*** is water resistant but not waterproof. Spilt liquids on the timber floor should be mopped up immediately. Prevent prolong water detention on the timber.
